

DISTRICT OF COLUMBIA ANG MAINTENANCE OFFICER MILITARY VACANCY ANNOUNCEMENT

**POSITION, TITLE, LOCATION**

Drill Status Guardsman (Part-time)
Maintenance Officer – 21A
113th Maintenance Group
District of Columbia Air National Guard
Joint Base Andrews, MD 20762

NUMBER OF POSITIONS:

1 Position Available

OPENING DATE:

4 August 2025

CLOSING DATE:

15 November 2025

AREA OF CONSIDERATION:

Position is open to personnel seeking a commissioning opportunity who meet the identified qualifications. This is a commissioning opportunity.

DUTIES:

Leads, trains, and equips personnel supporting aerospace equipment sustainment and operations. Manages generation, sustainment, and modernization of aircraft and associated equipment. Administers aircraft maintenance programs and resources. Directs aircraft maintenance production, staff activity, and related materiel programs to generate and sustain units' missions. Assesses unit capability and advises senior leadership on solutions to improve the unit.

Implements the Squadron Commander's intent to ensure readiness of assigned aircraft, personnel, and equipment to meet wartime, day-to-day mission requirements, and any Active Duty to support District of Columbia emergencies. Plans, organizes, and oversees the activities of the organization to direct flying operations. Establishes, reviews, and/or revises policies, procedures, mission objectives, and organizational design for the assigned staff, as necessary to eliminate work problems or barriers to mission accomplishment. Directs all functions to provide mission generation support by executing both on-equipment and off-equipment activities to produce properly configured, mission-ready weapon systems to meet contingency and training mission requirements for both operations and maintenance personnel. Constantly exercises conflict-resolution skills to deconflict flying schedule priorities supporting wing mission requirements, Operations and Maintenance Training requirements, and real-world commitments. This also involves fluctuating deadlines, supporting multiple AMUs at dispersed locations, and work occurring on 2 or more shifts.

Through subordinate functional supervisors, directs and supervises staff and production functions affecting very complex, high-performance aircraft with a wide variety of high-cost, sophisticated systems, controlling approximately two-thirds of base dollars. Directs a group work force of skilled Active Guard Reserve, Dual-Status technicians, and Drill Status Guard members.

Reviews, accepts, amends or rejects work which has been accomplished by subordinate supervisors and organizations. Develops and executes the Squadron Commander's Inspection Program (CCIP) assessing the organizations ability to execute the mission, manage resources,

develop personnel and improve the unit. Gives advice, counsel, and instructions to supervisors and subordinates on both general policy and administrative matters. Consults with subordinate supervisors and training specialists on training needs.

Provides professional development and training to ensure all assigned personnel and organizational entities are fully capable of performing their wartime tasking. Plans, organizes, schedules, controls, and directs unit aircraft maintenance resources to meet mission requirements. Directs programs to ensure mission accomplishment and the optimum use of resources. In conjunction with the other Wing organizations, plans and executes the maintenance elements of the flying hour and training program to ensure the Wing can meet contingency and wartime tasking of Mission Generation Force Elements. Through subordinate supervisors, manages aircraft maintenance activities. Ensures resources such as facilities, manpower, equipment, communications, technical data, tools, and parts are adequate to meet the unit's peacetime and wartime mission. Fights for and provides advocacy for additional funding when necessary to support wing flying and overall squadron mission requirements.

Coordinates with appropriate groups in the wing to ensure an integrated approach to action solutions of problems relating to fleet health, availability of aircraft, and the ability to conduct the military mission. Assess the impact of the flying schedule and schedule changes program to ensure that aircraft requirements and configurations can be met. Plans, implements, and coordinates multiple complex and often competing mission requirements and commitments involving AFFORGEN and aviation packages, which may require the activation and deployment of an adaptable, agile force able to respond to dynamic worldwide events. Ensures the unit retains the capability for the simultaneous execution of home station maintenance and training. Confers with applicable base support functions to ensure that squadron needs and requirements are being satisfied. Balances risk to ensure appropriate allocation and prioritization of resources required to meet mission requirements.

QUALIFICATIONS:

- Bachelors Degree.
- Be able to complete Officer Training School (OTS) / Total Force Officer Training (TFOT) prior to your 39th birthday.
- Applicants must have a qualifying score on the Air Force Officer Qualifying Test (AFOQT) IAW DAFMAN 36-2032 Table 5.1 to apply for this position.
- Current and passing fitness assessment (within 12 months).

EVALUATION PROCESS:

Applicants are required to meet a board. Selectee will be assigned to compatible military position in the 113 MXG, primary duty location will be at JB Andrews, MD. Selectee will attend the ANG commissioning program, OTS/TFOT. Upon successful completion of OTS/TFOT, selectee will be required to attend the Aircraft Maintenance Officer Course (AMOC) at Sheppard AFB, TX.
